

A just, net zero, nature-rich city & region

true north

social innovation

community- and citizen-led practices, co-design, and inclusion

building trust & a durable social mandate for change through co-production with civil society partners

arts & culture: storytelling, celebrating local heroes, empowering/amplifying historically excluded voices

strengths-based, community co-benefits ethos: meeting people 'where they're at'

fostering joined-up climate action & investment planning from neighbourhood to city, region & nation

seeding investible project pipelines & business sector action: Community Climate Action Prospectus, Climate Leaders Group

blended finance vehicles: Green Growth West Impact Fund, Bristol Climate Action Investment & Bristol City Leap

novel funding models, investment strategies, and resource mobilisation

financial innovation

learning innovation

systems for knowledge generation, exchange, and adaptation

embedding just transition principles & diverse community insights in decision-making

building toward shared impact metrics: Climate City Contract & Community Climate and Nature Plans

fostering climate leadership across civil society and future generations

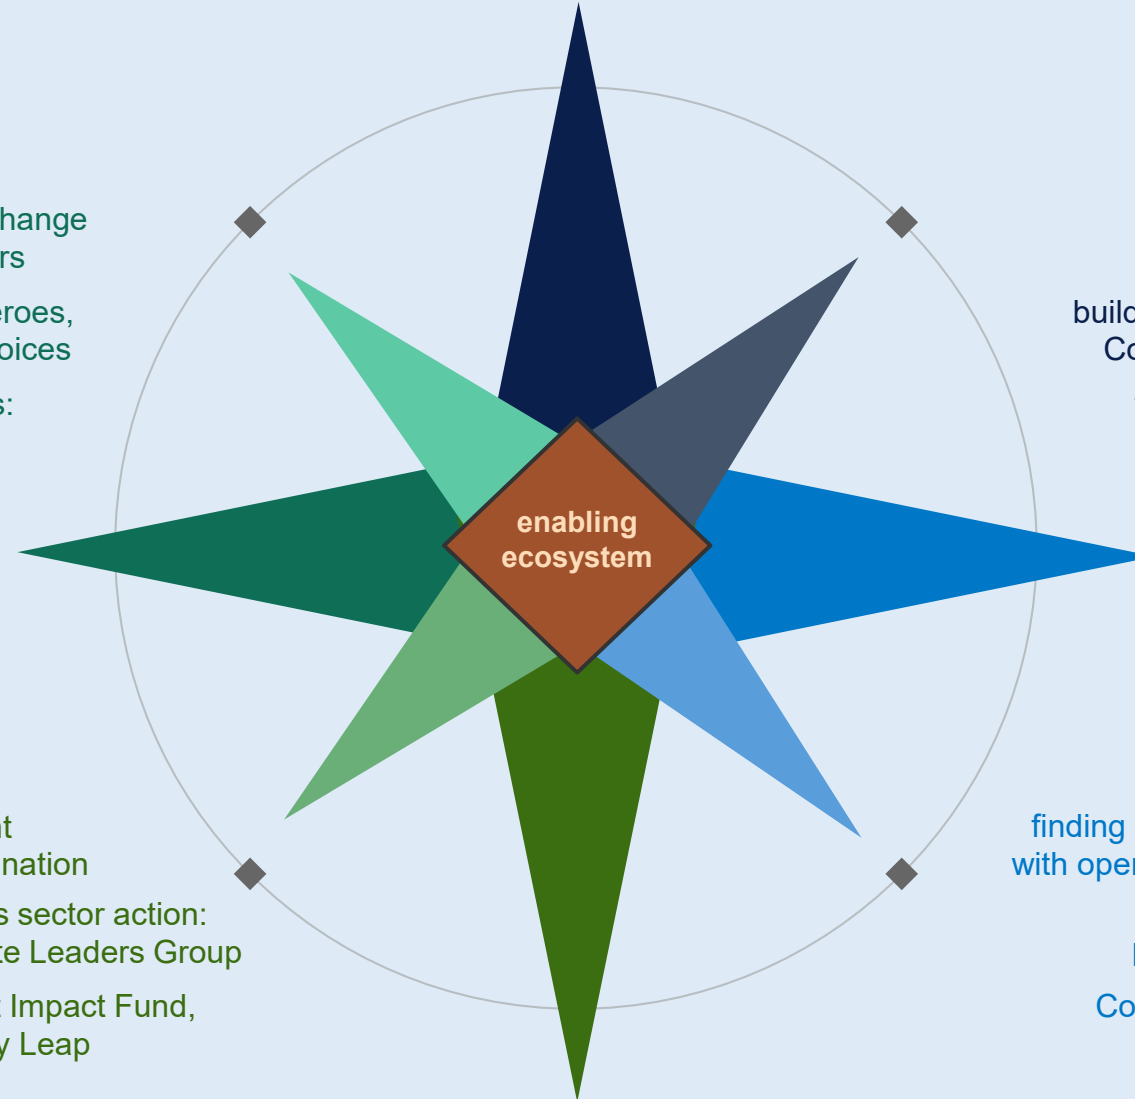

finding 'productive margins': bridging formal structures with open, networked & community-led ways of working

One City boards, system of shared missions & Bristol Advisory Committee on Climate Change

Community Leadership Panel on Climate Change and Just Transition & Bristol Transition Team

new structures, processes, and coordination mechanisms

governance innovation

enabling ecosystem — the relational 'people work' and 'impact infrastructure' that hold the innovation domains together

anchor people, brokers & a neutral space — a diverse network with dedicated cross-sectoral connectors who translate across cultures, learn by doing, and build a shared vision of the what and how of realising a just transition in Bristol and beyond
